Imagine Tomorrow® Kids Computer Classes

Program Description: Imagine Tomorrow Kids Computer Classes teach high-end technology concepts in a way that children (ages 3 - 7) can really understand. Children become Computer Detectives going on a mission working individually on supplied laptops and software custom built for each lesson. The software adjusts to each child's academic and technical ability level which makes it great for siblings to take together. Younger children work on letter & number recognition on the keyboard, older/advanced children learn proper finger placement and sharpen keyboarding skills. All are exposed to a unique technology concept each mission and parents receive an online password for continued activities to do at home. Over the break, each 3-hour class includes 2 missions and off computer re-enforcement activities. Since each mission is separate and unique, Detectives can join for one class or enjoy solving all 8 missions over the 4 days! A ratio of only 5 children/teacher, so classes stay small. Learn more about the classes at www.ImagineTomorrow.com!"
